YouTube Captions You can also take a camera phone and add text captions to it. You can then upload it to YouTube and you will have an instant auto-generated video file. This feature is great if you are about to create a video about anything and want a ready to go video for it. Face Detection But why limit yourself to only text captions or even audio clips? If you have a video of your friends, you can pull up a picture of them and have it automatically in front of them in the video. Face Detection feature of YouTube video player allows you to do that. VidVox Music Maker VidVox Music Maker is a powerful music creation tool which allows you to make MP3 and WAV files from your favorite songs, mix, and add beats. It allows you to cut any track from the source and transpose it with ease. A built-in sound bank gives you access to a wide range of all types of instruments and MIDI sounds. As you might know, all music is based on tones, chords, and rhythm, and they are quite easy to create. Therefore, it is quite easy to mix the sounds with just a few basic editing tools like cut, trim, add, and mix to create your own unique song. That's not all, the VidVox Music Maker also includes MIDI instruments that you can use to make your own song. The midi instruments include piano, acoustic guitar, electric guitar, drums, bass guitar, synth, and more. There are also special effects to apply to the instrument that will make your song unique and more powerful. Aside from music tools, the application also includes a music sequencer to help you sequence the instrument that will play when the song is ready. VidVox Music Maker is easy to use and it comes with a wide range of useful features which will help you make some awesome music.
