Jan 15, 2017 I tried to update the driver using the Windows driver that I downloaded and installed to a USB stick. This works for the most part and the GP 0504Pen now shows up under Device Manager in the Devices section. However, it does not respond to any button press and any inputs are not sent to the pen. When I try to use the GP 0504 Pen without the drivers, it works fine. GP0204_Driver_1.0.4. GP0504_Driver_1.0.2_windows.
