Purchased a new pc and i have installed (FS9) OSX Sierra (10.12.1) and it does not recognize the game so i reinstalled this P3D 4.2.0 update which does recognize. Its likely that there is no way to reconcile an old version of P3D with the new, so your best bet is to install your current version of P3D. If that's not the problem, then you may need to find a friend that has the old version of the game and use his or her account to authorize you. In either case, good luck!
