Description: Lumapix Fotofusion EXTREME 5.5 is a complete product with many unique features making this product a perfect companion for every traveler. It provides all the necessary necessities for a complete experience when you are on tour.from typing import Any, List from.._types import PyObject, PyObjectAndFile, PyObjectAndInput # There's no built-in distinction between Python and PyObject here, # but we need to distinguish between python/json.JSONEncoder and # json.JSONEncoder, and between pytest-debugger and pytest. class AbstractModule: iter: PyObjectAndInput @classmethod def __init__(cls: type, obj: PyObjectAndFile, *, m: PyObjectAndInput) -> None: if isinstance(m, PyObjectAndInput): for key, value in m.iter.iteritems(): setattr(cls, key, value) else: super(AbstractModule, cls).__init__(obj.obj, *m) cerebral infarction/brainstem infarction, demonstrated atrophy of the left thalamus, left parietal and occipital lobes in MRI. Regarding other patterns of brain atrophy, a previous study showed that diffuse brain atrophy was the most common brain atrophy pattern in patients with SVD, although focal pattern was the most frequent in patients with lacunar stroke \[[@pone.0157101.ref038]\]. In addition, 50% of patients with lacunar stroke showed asymmetric brain infarctions, and the occipital lobes were involved in 39% of those with lacunar stroke \[[@pone.0157101.ref039]\]. In our study, however, patients with lacunar stroke had more frequent atrophy in the left parietal lobe. Our finding was consistent with previous findings, suggesting a vascular etiology for the asymmetrical regional changes in the brain \[[@pone.0157101 ba244e880a
