wrong with this website. Q: How do I make a newline character in JavaScript? I'm trying to make a newline character in JavaScript but I don't know how. I tried " ", "\r ", " ", and "return " but nothing works. I know it's very important to make a newline character in JavaScript. A: I am guessing you are trying to make a

---

new line before the in your file. When you open a file with newline character. It shows. i.e. on the right you will see the file is written with a newline character. To get a new line you will have to save that file to disk and read it and parse it. Note It will not be a new line in your input file. Code snippet to read

---

the file and print result to console: `var fs = require('fs'); fs.readFile('input.txt', 'utf8', function (err, data) { if(err) return console.error(err); console.log(data); });` It will only output on console: I hope this help you. Clinical assessment of peripheral neuropathy in Fabry disease using quantitative sensory

---

testing. Fabry disease (FD) is a rare X-linked inherited disorder with widespread multisystem involvement. Peripheral neuropathy (PN) is the major problem affecting most patients. To assess the presence and severity of PN in FD. Electrophysiological and sensory tests, including light touch,

---

vibration sensation, pinprick and thermal threshold, and quantitative sensory testing (QST), were performed in 20 patients with confirmed FD. The median QST results were compared to those obtained in 20 age-matched healthy subjects. Results were correlated with clinical data. Twelve patients

---

(60%) exhibited sensory deficits involving various modalities. The median nerve showed severe sensory loss (CTSIB
