Then: Download this , open "patcher.exe", select "as-xeno.iso", then select "patch.ppf" and click "Apply". After that, you will notice that a new window has appeared with a list of files, select "xeno.iso" and click "Apply" again. First, you need xeno.iso (made with UltraISO, Alcohol 120%, Virtual CloneDrive, etc.) Then download the patch I listed above for each of the images. And finally, open the console, type the command "copy rdr.exe xeno.iso rdr.exe" After that, reboot. After loading Windows, you will see that Windows Xeno is installed instead of your OS.
