### Quickhead-E Crack + Free Download [Mac/Win]

\* Quickhead-E is an all-in-one service that performs all the functions of a POP3 or Hotmail account on a computer or mobile device. \* Quickhead-E is able to monitor all your POP3 and Hotmail accounts, for new mail, received or even deleted. \* With its intuitive interface, you can switch instantly between your mailboxes (and return to your mailbox as you like) with ease. \* Quickhead-E is able to mark and delete unwanted messages for you. \* It will also keep you updated about all the latest news and updates from your friends, and much more! \* A tool for personal use and a commercial software. Quickhead-E is a fast and simple solution for storing and managing mail. Quickhead-E For Windows Reviews Quickhead-E is a comprehensive POP3 and Hotmail client that is lightweight in nature. The program features a fantastic "Delete" and "Mark as Spam" function that quickly makes it easy to filter unwanted messages from your email. The program also supports an extensive feature set including such items as pop-up messages, article archives, chat support, RSS feeds, voice messages, and more. Review Quickhead-E Quickhead-E (short name for Quick Header Extractor) is a Windows based utility that resides in the system tray, and monitors all of your POP3 and Hotmail accounts, notifying you via a popup summary screen when new mail arrives. Not will it only save you the hassle of having to switch back and forth between your mail client and your work, it will also allow you to instantly mark unwanted messages for deletion, or to preview any important messages ahead of any less important mail. It does this by retrieving the header part of each new message, automatically, for offline viewing. If more than one account contains new mail, you can instantly switch between your mailboxes to review any new messages that may have arrived. Better than ever, version 3 contains some great new time-saving enhancements. ## What's New In Quickhead-E?

Quickhead-E is a free utility for Windows, designed to keep you informed of new mail in your POP3 (Usenet) or Hotmail(Mailspace) accounts. This allows you to know immediately whether you have new messages in your email account, whether you have any messages waiting to be downloaded and the total amount of data waiting to be downloaded. It is all done automatically, in the background, without the need for your PC to be on all the time. You can also choose to instantly download any important messages that have arrived. This saves you the hassle of having to switch back and forth between your mail client and your work, and allows you to instantly preview any important messages ahead of any less important mail. Quickhead-E is a free tool designed to keep you informed of new mail in your POP3 and Hotmail accounts. It works automatically in the background without the need for your PC to be on all the time. You can select messages to instantly download and view messages on-the-fly. The program also includes a new system tray icon that displays the number of unread messages in your account and your download statistics. You can also quickly jump to any messages with new messages. When you're ready, you can instantly download all your new messages. After downloading, messages are automatically saved on your hard drive, or you can set them to automatically appear in the mail folder of your chosen mail client. Quickhead-E works perfectly with popular mail clients such as Microsoft Outlook, Outlook Express, Eudora, Outlook for Mac, Eudora for Mac and more. Version 2 has been improved to add support for more mail clients and more options for the POP3 server. It is also the first version that allows you to instantly download all messages instead of requiring you to download just the new messages. Version 2 now includes POP3 (Usenet) support. Version 2 now includes Hotmail (Mailspace) support. Version 2.00 features include: - Added support for Hotmail (Mailspace) - All important new mail is instantly downloaded. - Added a detailed summary of new mail with a percentage of messages downloaded. - You can instantly mark messages for deletion. - You can instantly download all new mail in your account. - You can automatically select which message to download to a folder. - The amount of data waiting to be downloaded is shown in the summary. - The POP3 (Usenet) server name, port and server type are shown. - A small icon is shown in the system tray which shows the number of unread messages and the amount of data waiting to be downloaded. - A quick menu is now added to the summary popup to allow easy access to the settings and preferences. - Settings can now be easily viewed in the Options dialog. - Settings can now be changed
