Q: Multiply color pixels from one image into another image with Python I want to multiply a small color pixels from one image into another image. For example: "Original image" becomes "Multiplied" How to achieve this in Python with numpy array? A: You can multiply one numpy array by another one using numpy.dot(). It may sound un-pythonic, but it's fairly simple: import numpy as np # These two arrays have the same shape and contain the same values # In this case, size(a) = (2, 2) and size(b) = (4, 4) a = np.array([[[1, 1], [1, 1]], [[1, 1], [1, 1]]]) b = np.array([[[1, 0], [0, 1]], [[1, 0], [0, 1]]]) # Multiply first element of a by first element of b out = np.dot(a, b[0]) # for all elements of out print out Results in: [[1. 1. 1. 1.] [0. 1. 1. 1.]] Dijit Dijit is a town in the Central Region of Uganda. Share Info Info Gregory Dart: Through the Looking Glass Published: November 2004 Gregory Dart is a poet, theorist, and artist. Through the Looking Glass is a book of prose and art. His work in general has been influenced by the figure of the creative writer—the writer as artist and thinker. His recent projects include Cidney the Music Machine, a kinetic sculpture about the creative act of writing. In this interview, Dart talks about his work as a writer and reader and his personal fascination with the same concepts. —George Sessions GS: Why did you start writing poetry? How old were you? GD: I began writing because I was struck by poetry in adolescence, and I felt that my head was full of it, to the point where it drove me to make more than my voice could hold. I wrote a very good poem about the experience for a contest in the ninth grade, and was given a certificate. At around that time, I also started going out to literary events in pubs. I didn't really start writing more widely known poetry until I was in college, and I think it was in that period, when my first book of poetry—Eleven Hundred Ways of Looking at a Small Object—was published, when I began to make a conscious effort to write "poetry." But I also have a very conscious awareness that I've written various types of prose, including a novel in the early 1980s. I think it was a very interesting book, and I don't think I'd have my awareness of the manner in which prose works if I hadn't written the novel, [and] I'm sure that I wouldn't have as much of a way of working with both prose and poetry [and] also with the very interesting way in which "prose-poetry" can work. GS: I read Cidney the Music Machine, which you explained to be a kinetic sculpture that moves through space, which leads me to ask what I imagine are two questions: first, why did you choose that specific medium? And second, when I read that description, I imagined a line or two of writing and a picture or two that are linked to the sculpture, and I wondered if you could talk to that for a minute. GD: In terms of my work, it may seem that I have a very specific thing to say, but I've never felt
