Hi,I know this is a very old request and i do understand that no one has made any attempt at coding it up but as a python programmer i have been fiddling with python quite a bit so i thought id give it a try.can anyone see something wrong with this? I am new to python and programming. i am trying to make a python script to change the audio player file to a particular audio file when i click the start button, and changing it back when i click stop button,the problem is when i try to close it the program stops responding and usually closes itself I am not a programming expert, but I wanted to make this script in my free time. I am not getting any errors. It runs fine on my computer but when I try to run it on my friend's computer it gives me a "python file not

found" error message. Do you know what the problem is? I know this is an old post, but I still wanted to add a fix.Q: Making
