What's New in the HiBit Uninstaller?

HiBit Uninstaller is an utility that can scan, find, and remove leftover files and registry entries created during installation of applications. It allows you to detect and fix registry problems, as well as remove invalid system entries and make your Windows clean and speed up. HiBit Uninstaller scans your Windows system, detects installed and non-installed applications, detects non-required registry keys and leftover files, and then removes them. It also removes invalid entries from the system registry, clears out empty folders and broken shortcuts, and cleans out the junk on your computer. All that is left is a clean Windows registry, a clean search index, an optimized system, and an error-free PC! Key Features: Detects installed and non-installed applications. Detects invalid registry keys and leftover files. Detects and removes non-required registry keys and leftover files. Remove all invalid entries from the system registry. Remove all unnecessary, empty folders and broken shortcuts from the desktop. Fix invalid permissions and registry errors. Optimizes the Windows registry. Supports all Windows versions. Option to see all currently installed programs. Delete Windows Store apps. Delete scheduled tasks. Delete context menu entries. Delete startup entries. Delete services. Manage startup programs. Manage services. Detect, prevent and remove malware. Modify registry settings. How to get the media: 1.
