If you love word games, you'll love this small word game that has all the features of a real word game, but the animation and graphics make it more appealing. The idea behind the game is simple: you pick a letter from the given word, and then you get to move to that letter to pick another letter from the word. The more of that second letter you get, the more points you earn. The only drawback to the game is that the word must be sung, and there are not very many words in the dictionary. There is an audio option as well. Download a 20-minute free trial, or purchase the Full Version and enjoy word games any time. Select a letter and get to chase that letter to get another letter. The word, when sung, is limited to 5 letters, but you can increase the range of the sung word to 9 letters. You can also use the faster mode to play all words or just the words with the highest frequency. Choose between 3 levels of difficulty, the fastest mode, and the Slow Mode. If you like this game, you can purchase the Game Builder Pro Version, or play
