New goal celebration animations will also be powered by motion capture data to make the celebrations more realistic. The game will continue to deliver moments of magic with new off-ball movement controls that keep players close to the ball and in control. These off-ball controls will take the player out of the situation, a feature that was popular among fans of World Cup 2018, and evolve the on-ball feel of previous FIFA titles. FIFA 18 was the biggest title of the series, so expectations for FIFA 22 are astronomical. We got a chance to check out the new in-game engine in motion, and while we were impressed by the visual and gameplay enhancements, we're most excited about the new motion-capture technology, which captures and uses player motions from real-life football, making the game feel more lifelike. Loading FIFA 22 PS4 was played with a custom PS4 Pro system in a review configuration provided by EA Sports. The Xbox One version was played with the EA Sports PlayStation One Controller. The PC version was played with the standard controller and mouse. King Of The Hill FIFA 22 gameplay continues to focus on passing, as dictated by the game's controlling methods. The difference this time is that the player won't be able to dribble past an opposing team when pressing the D-pad to control the player. Instead, the player will be able to perform a tackle against an opponent which will knock the player off balance and force them to the ground, giving the controlling player an opportunity to chop the ball out of play. Loading The biggest change to the gameplay in FIFA 22 is the new "HyperMotion Technology," which uses motion capture data collected from real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay. The player will also be able to use their acceleration while sprinting to control the player's speed. Players will also have more control over their movement, and will be able to use their powers to shift the ball, change direction in mid-air and shoot while in the air. In addition to these new abilities, the game will continue to deliver moments of magic with new off-ball movement controls that keep players close to the ball and in control. These off-ball controls will take the player out of the
